

DESCRIPTION

The Preso Coin Back-to-Back wedge flow meter accommodates most flows, even the most abrasive. This compact DP flow meter has taps built into the flanges to read the instrument taps. This type of wedge meter is effective with abrasive slurries, viscous or dirty fluids. This type of differential technology is a proven, consistent measuring technology for media in the upstream, midstream and downstream applications. Accuracy and reliability are achieved with rugged construction, practical design, and a simple principle of operation. It stands alone in its ability to maintain the necessary square root relationship between flow rate and differential pressure for almost any type of flow.

CONFIGURATION

The inlet section is the same diameter as the incoming pipe section and followed by a precise, segmented, angled section equal on both sides for bidirectional flow measurement. The H/ID ratio is determined by the manufacturer according to recognized standards and formulas. The discharge coefficient (Cd) is linear and stable in the operating flow range.

ACCURACY AND REPEATABILITY

The accuracy of the Coin meter is within $\pm 3.0\%$ (uncalibrated) and $\pm 0.5\%$ (calibrated) with a repeatability of $\pm 0.2\%$ and turndown of 10:1 in the corresponding range of Reynolds' Numbers. For custody transfer applications the Coin meter is flow tested by an independent NIST certified laboratory under the design operating conditions and piping configurations.

APPLICABLE FLUIDS

Typical core applications for wedge meters include high-viscosity fluids, slurries, corrosive fluids, contaminated air/gas and more.

BENEFITS

- Reynolds Number: as low as 300
- Abrasive & Erosive Slurries, Multi-Phase Fluids, Viscous & Dirty Fluids, Clean Fluids, Steam or Gasses
- Easily installed in any position with minimal straight pip requirements.
- Resists wear, maintenance free (no moving parts)
- Bi-Directional flow measurement

FEATURES

- Smaller profile to fit in tighter configurations
- Turndown ratio: 10:1
- Mass flow output with multivariable transmitter (accuracy $\pm 0.5\%$ calibrated)
- Repeatability: $\pm 0.2\%$ of readings
- Reynolds number measurement down to 300
- High viscosity measurement to 3000 and higher
- Sizes 0.5... 10 in. (call for extended sizes)
- Manufactured to ASME, ANSI B31.1, NACE MR-0175, CSA-Z299.3
- ISO-9001 certified design and fabrication

SPECIFICATIONS

Applications	Water, oil, steam, air/gas, other liquids, sludge/slurries, molten rubber, molten sulfur, asphalt, crude oil, polymers, phenol resin, ammonia gas, hot tar, pulp stock, wet gases.
Pipe Sizes	0.5... 16 in. (13...406.40 mm)
Temperature Range	Up to 800 F (426.67° C)
Pressure Range	Depends on flange rating
Accuracy	$\pm 3.0\%$ uncalibrated; up to 0.5% calibrated
Repeatability	$\pm 0.2\%$
Turndown Ratio	10:1
